Mauricio Santos-Vega

epiCo provides statistical tools for the analysis of demographic trends, spatiotemporal behavior, and outbreaks characterization of vector-borne diseases in Colombia

Motivation

Goals

Modules

Demographics

Spatiotemporal

Outbreaks

Decision support

Demographics

Modules

```
library(sivirep)
library(incidence)
library(epiCo)

years_to_analyze <- c(2015:2021)
events_to_analyze <- c("DENGUE", "DENGUE GRAVE", "MORTALIDAD POR DENGUE")

data_dengue <- data.frame()

for(y in years_to_analyze) {
  for(e in events_to_analyze) {
    temp_data_dengue <- sivirep::import_data_disease_by_year(y,e)
    data_dengue <- rbind(data_dengue, temp_data_dengue)
  }
}
```

Demographics

Modules

```
data_dengue_ibague <- subset(data_Dengue, COD_MUN_0 == 73001)
```

```
ethnicities <- data_Dengue_ibague$PER_ETN[data_Dengue_ibague$PER_ETN != 6]  
describe_ethnicity(ethniclables = ethnicities, language = "EN")
```

```
>>
```

```
Indigenous - count: 22 cases
```

```
"A person of Amerindian descent who shares feelings of identification  
with their aboriginal past, maintaining traits and values of their  
traditional culture, as well as their own forms of organization and  
social control"
```

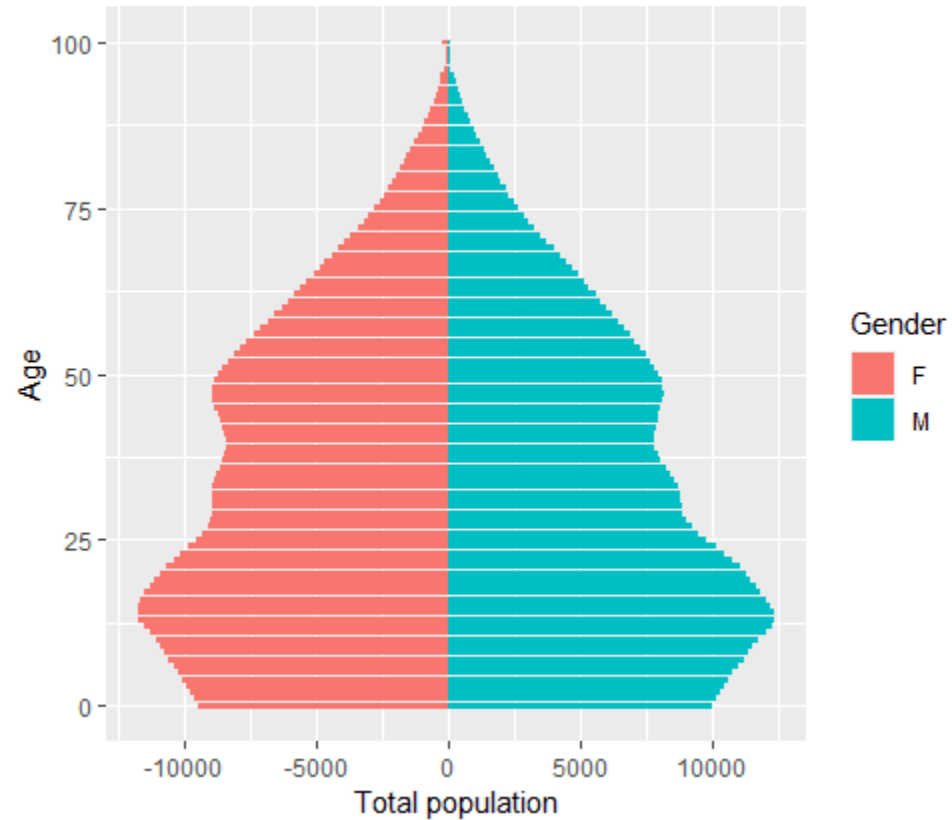

Demographics

Modules

```
ibague_pyramid <- population_pyramid(divipola_code = 73001, year = 2021,  
                                     gender = TRUE, total = FALSE, plot = TRUE)
```

Demographics

Modules

```
ibague_age_risk <- age_risk(age = data_Dengue_ibague$EDAD_A,  
                             gender = data_Dengue_ibague$SEXO,  
                             population_pyramid = ibague_pyramid)
```

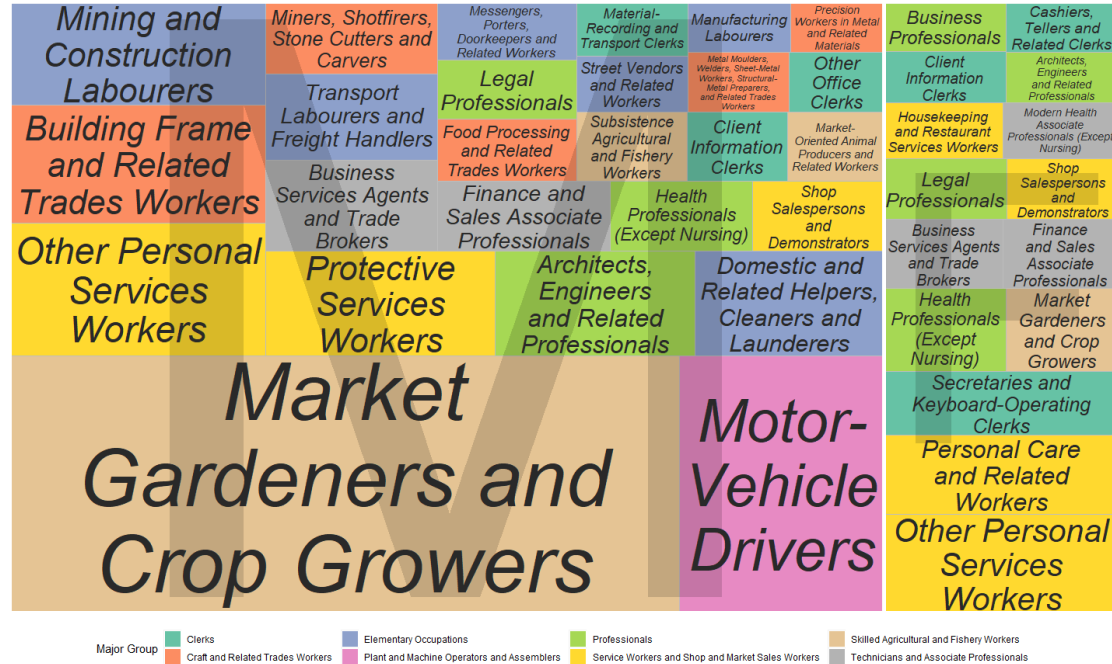

Demographics

Modules

```
ibague_occupation_dist <- occupation_dist(data_Dengue_ibague$OCUPACION)
```

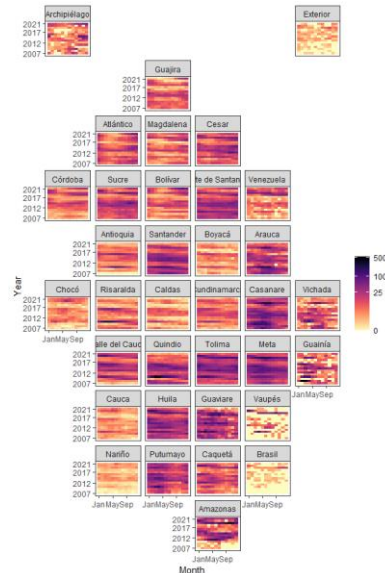

Modules

Spatiotemporal

```
colombia_incidence <- incidence::incidence(data_Dengue$FEC_NOT,
                                           interval = "1 week",
                                           groups = data_Dengue$COD_MUN_O)
```

```
colombia_incidence_rate <- epiCo::incidence_rate(
  incidence_object = colombia_incidence,
  level = 0, scale = 1e+05)
```

Modules

Spatiotemporal

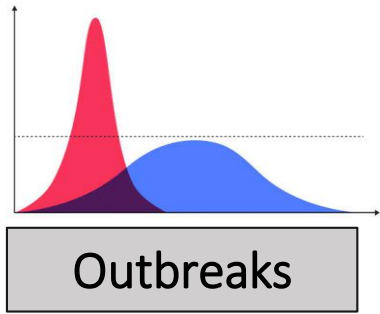

```
morans_index(colombia_incidence_rate, threshold = 2, plot = TRUE)
```

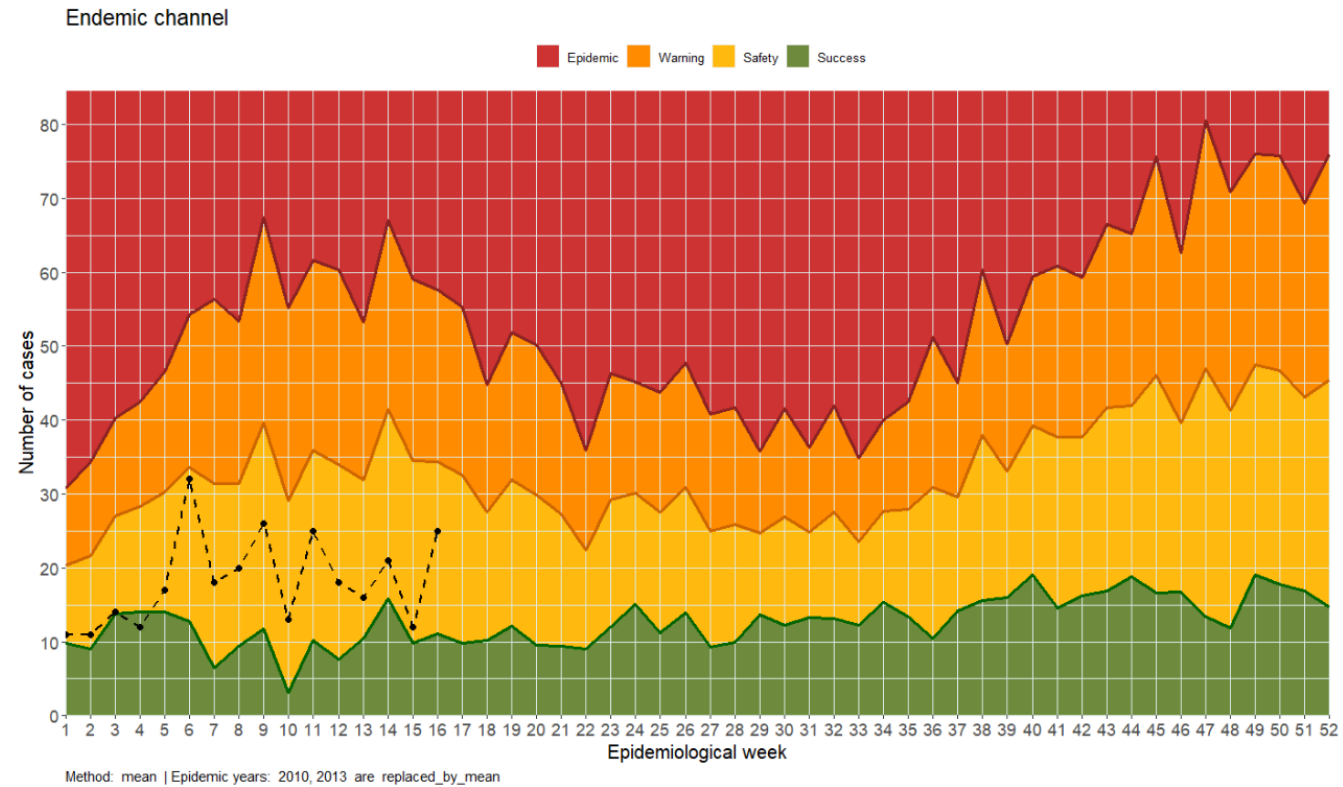

Travel time parameter i.e. neighborhoods are not defined solemnly on distances but in real travel connectivity

[Bravo-Vega, Carlos, et al. 2023](https://doi.org/10.1371/journal.pntd.0011117)
<https://doi.org/10.1371/journal.pntd.0011117>

Modules

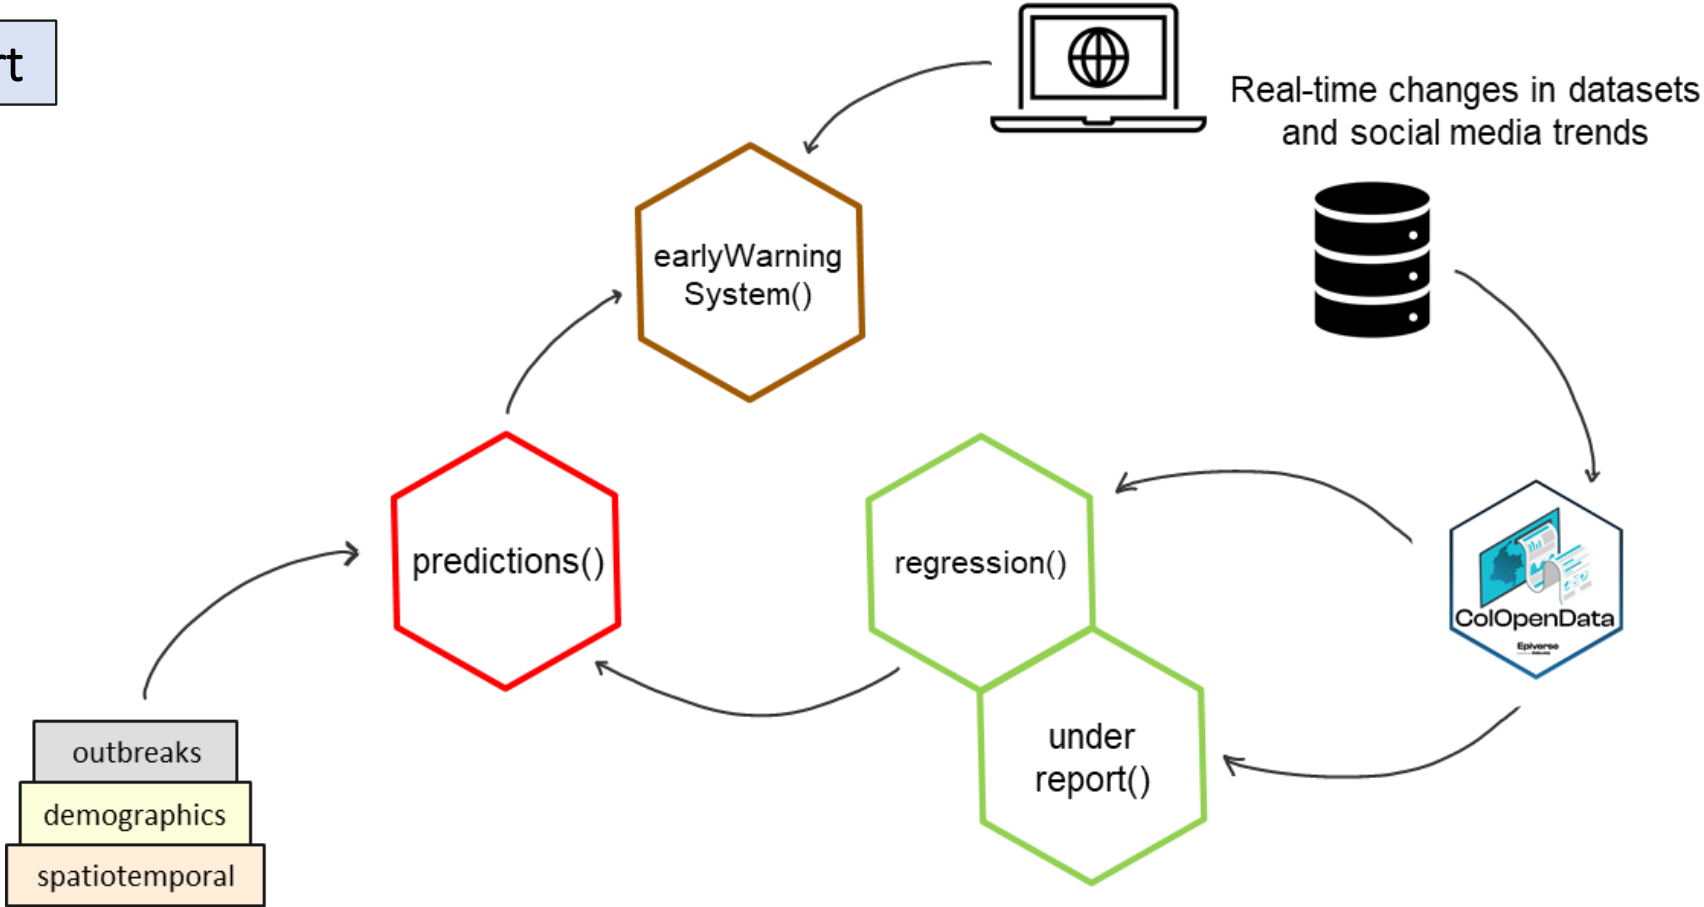

```
endemic_channel(observations = obs,
                incidence_historic = colombia_incidence,
                method = mean, outlier_years = NULL)
```

Modules

decision support

Repository

```
remotes::install_github("epiverse-trace/epiCo")
```

- demographics and spatiotemporal modules have an stable version on GitHub
- Our repository is open to suggestions and features requests
- First user testings are taking place in April and May

Thanks!
